# Symptoms of cervical cancer

# About this easy read booklet

This booklet is about symptoms of cervical cancer.

You can learn about symptoms that you should have checked straight away.

If you are worried about your health, you should talk to a doctor or nurse.

# Symptoms of cervical cancer

You need to go to your doctor as soon as you can if you have any of these **symptoms**.

**Symptoms** are signs in your body that tell you something is wrong, like feeling tired all the time.

Tell your doctor:

- If you are bleeding a lot more than usual during your **periods**.

Your **period** is when you bleed from the **vagina** once a month.

The **vagina** is a passageway inside your body. It is part of a woman's sexual organs. The entrance to the vagina is between your legs.

- If you are bleeding between your periods.

- If you are bleeding after sex.

- If you are bleeding from the vagina after you have had the **menopause**.

The **menopause** is the time in a woman's life when her periods stop. It is usually between the ages of 45 and 55.

- If you have smelly **discharge** from your vagina.

A **discharge** is a liquid which comes out of your body. It can be thick or thin and can sometimes smell.

- If you have pain in the lower tummy or back.
